

Project Design Document

08/23/2026

Name: Gökmen Dursun

Project Concept

1

Player Control

You control a

Humanoid

in this

2.5D Side-View

game

where

WASD

makes the player

Move forward, back, looking up and looking down

2

Basic Gameplay

During the game,

Enemies, obstacles (crates for exemple)

appear

from

The right side of the screen

and the goal of the game is to

Beat the final boss and save your world (the tale is in development)

3

Sound & Effects

There will be sound effects

For the dash, the parry, the attacks, everything

and particle effects

When your power is full so that the player understands that they can make a special attack

[optional] There will also be

There will be 5-6 musics in the game made by my brother.

4

Gameplay Mechanics

As the game progresses,

You learn new mechanics, you learn to parry and dash, and the enemies are harder to kill

making it

Fun because you progress but you also struggle against different type of enemies

[optional] There will also be

The hood will be correlated with the special attack

5

User Interface

The

life

will

decrease

whenever

You fall, whenever you take damage

At the start of the game, the title

Of the game

will appear

and the game will end when

You beat the boss and save your world

6

Other
Features*Some enemies will be parryable but not dodgable, and vice versa*

Project Timeline

Milestone	Description	Due
